

Dear colleague,

The next BeiGeneius webinar, entitled ‘**The present and future of BTK targeting in CLL and WM: Expert perspectives from ERIC 2024 and IWWM-12**’, will take place on Thursday, November 28, 2024, from 16:00–17:00 (CET).

World leading clinical researchers gathered at ERIC 2024 and IWMM-12 to explore the present and future of CLL and WM, respectively. With a focus on BTK targeting, which is fundamental to the management of CLL and WM, our expert faculty will share their highlights from the two meetings, before examining differences and commonalities between these two B-cell lymphomas.

The faculty will welcome your thoughts and questions throughout the webinar, so please join the conversation!

Yours faithfully,

**Christian Buske**  
**(Chair)**

University Hospital Ulm,  
Germany

**Paolo Ghia**

Vita-Salute San Raffaele  
University and IRCCS San  
Raffaele Hospital, Italy

**Shirley D'Sa**

UCLH NHS Foundation  
Trust, London, UK

Time (CET)	Session title	Speakers
16:00	<b>Welcome and introductions</b>	Christian Buske
16:05	<b>An expert perspective on BTK targeting in CLL from ERIC 2024</b>	Paolo Ghia
16:20	<b>An expert perspective on BTK targeting in WM from IWWM-12</b>	Shirley D'Sa
16:35	<b>BTK targeting in WM: Lessons from CLL</b>	All faculty
16:55	<b>Summary and close</b>	Christian Buske
